AUTOMOTIVE TIRE
SIDEWALLS

DESCRIPTION: -10 mesh rubber particles will fall through a screen with 10 wires per inch. This results in a particle size of less than 0.09 inches or 2.2 mm. There is a small fraction, typically less than 5%, of fiber imbedded in the rubber crumb. Not magnetically separated - we start with wire free rubber.

TYPICAL USAGE: Rubber mats, pavers, flower beds, golf course soil augmentation, concrete, and crumb rubber modified (CRM) hot mix asphalt.

Soil augmentation for lawns - apply at a rate of 1/4" per month for 3 months. Less water required, reduced root damage due to traffic, and improved fall protection.

ADVANTAGES: Made from 100% recycled tires
Environmental responsible - non-biodegradable, considered inert
Safe for children, pets, or animals - non-toxic
Resistant to bug infestation, mold, or mildew
Remains flexible summer and winter
No need to refresh in the spring
Nearly unlimited life
Soft under foot

PRICING: \$0.50/lb in 50 lb bags. Approximately 2 cubic feet per 50 lbs.
